About 150 participants from various industries in Sarawak attended the forum.

The Associate Professor Annie Wong of UiTM presented the findings to the participants. She highlighted the different types of costs in doing business, for example, transportation, utilities, land, energy

She also pointed out that a stronger partnership between the public and private sectors is essential to lower the cost of doing business in order for us to remain relevant in a competitive global economy.

A dialogue between Datuk Patinggi Tan Sri Dr. Chan and the participants was held immediately after the presentation. Datuk Patinggi Tan Sri Dr. Chan commented that he understood the common issues raised by the manufacturers and the State Government would look into the findings of this six-month study as well as issues raised at this forum, in particular the high transportation cost.
